1 INTRODUCTION ABOUT TIS VIETNAM

1.1 BUSINESS ACTIVITIES OVERVIEW

TIS VIETNAM is a leading company in Vietnam providing a full package of **smart home solutions including smart parking, light electric systems** for buildings, villas, houses, offices, hotels, etc.

Business areas:

-  Consulting, Designing Solutions
-  Distributing, Supplying Equipment
-  Programming, Integrating System
-  System Warranty, Maintenance

Our brands:

1.2 VISION & MISSION

VISION

Becoming the best smart home appliance and solutions provider

in Vietnam with business philosophy:

- Product quality is the focus
- Client benefits are the key

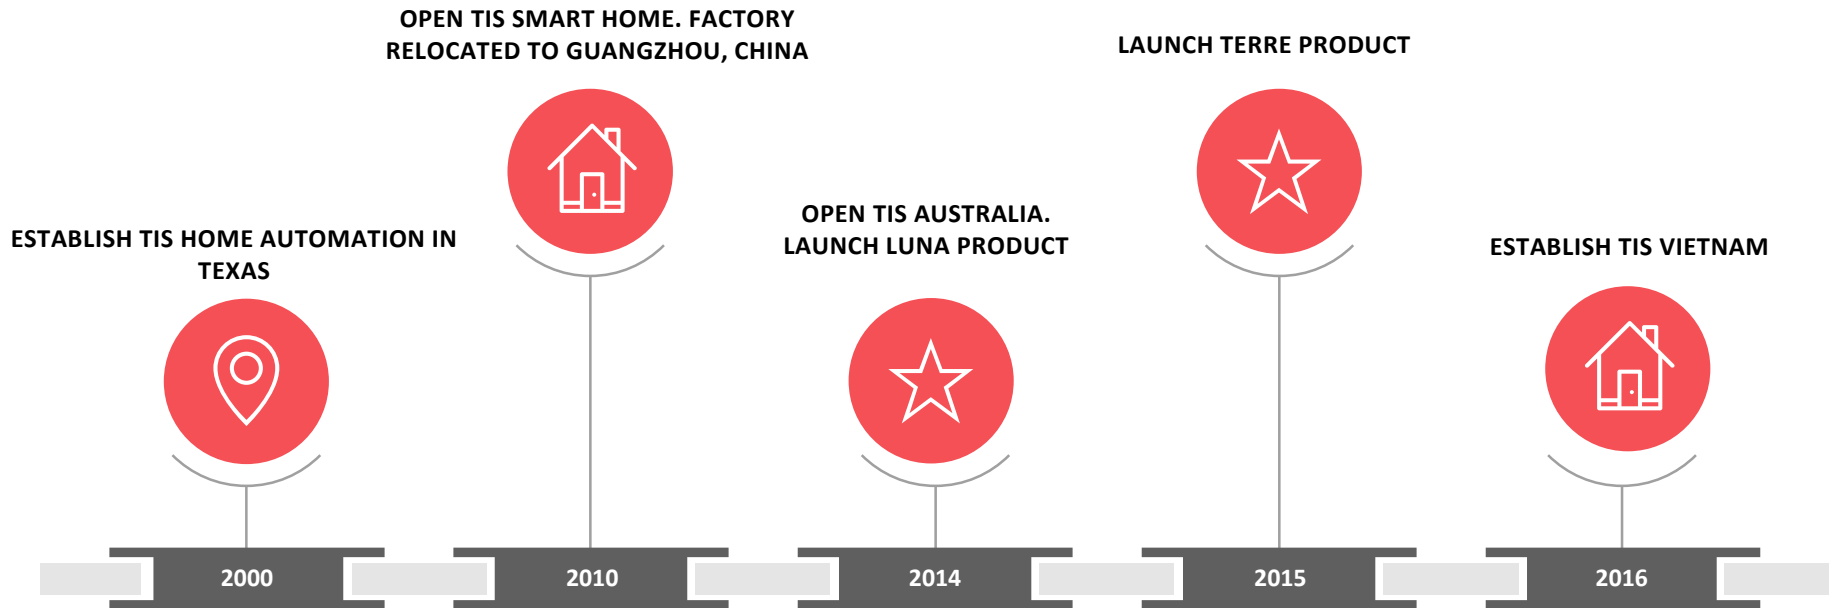

MISSION

Bring to clients the smart home solution with the most advanced technology, good quality and reasonable cost

Satisfy the need to experience a comfortable and classy life of customers

1.3 DEVELOPMENT HISTORY

TIS SMARTHOME

- TIS SMARTHOME is a brand from the USA with more than 15 years' experience in the field of home automation and smart home
- Products are designed beautifully and exquisitely
- High quality products, friendly and safe for users
- TIS Smart Home Products:
 - Chipset and IC from Texas Instruments are durable and reliable
 - Product cover, mainboard, IC meet American UL fire safety standards and European ROHS safety standards
 - All TIS products meet the following certifications:

1.4 PRODUCT & SOLUTION

A. SMART LIGHT SYSTEM

- Lights only light in areas with people, automatically turn off when no people
- Automatically adjusts brightness according to the time and preference of the owner

B. CURTAIN CONTROL SYSTEM

- Curtain remote control, close/open the curtain according to the script already established
- Control combined with lighting, sound, and multimedia entertainment

C. SMART CAMERA SYSTEM

- Supervise every area of the house anytime, anywhere
- Automatically record images when motion is detected
- Easy to access and observe from anywhere with Internet access

D. VIDEO DOORBELL SYSTEM

- Ring and display guests on tablet and smartphone screens when no one is home, allowing you to communicate with guests and open doors for guests to enter if needed

E. SMART SECURITY SYSTEM

- Protect House 24/7
- Controlling the risk of fire and explosion (gas leak, electric shock, etc.), illegal intrusion, etc....

F. ENVIRONMENTAL CONTROL SYSTEM

- Control temperature, humidity, oxygen concentration at appropriate level
- Automatically control air conditioners, dehumidifiers, and ventilation fans based on measured parameters

G. MULTI-AREA AUDIO SYSTEM

- Play music, movies according to preferences in different regions
- Automatically play music, show movies according to scenario and set time

H. SMART GARDEN SYSTEM

- Automatically water plants in the garden every day according to predetermined time
- Turn on and off lights automatically or according to predetermined scenarios

I. SMART GARA SYSTEM

- Automatic door control with smart controller without leaving the car
- Control combined with lighting, security system

J. SMART CLEANING SYSTEM

- Smart toilet set for bathroom with heat sensor faucet, automatic hand dryer and automatic water flushing device
- Control combined with lighting, sound, and multimedia entertainment.

1.5 CONTROL CAPACITY OF TIS SMART HOME

Control unlimited space

Control by time:
morning, noon,
afternoon, evening

Control by smart watch,
smartphone or tablet

Script control:
reception, dinner,
movie, relaxing,
going to bed ...

Options between a wired solution (with the advantage of stable use, suitable for projects in the construction phase) or wireless solution (suitable when upgrading old buildings)

2 SMART HOTEL/ RESORT SYSTEM STRUCTURE

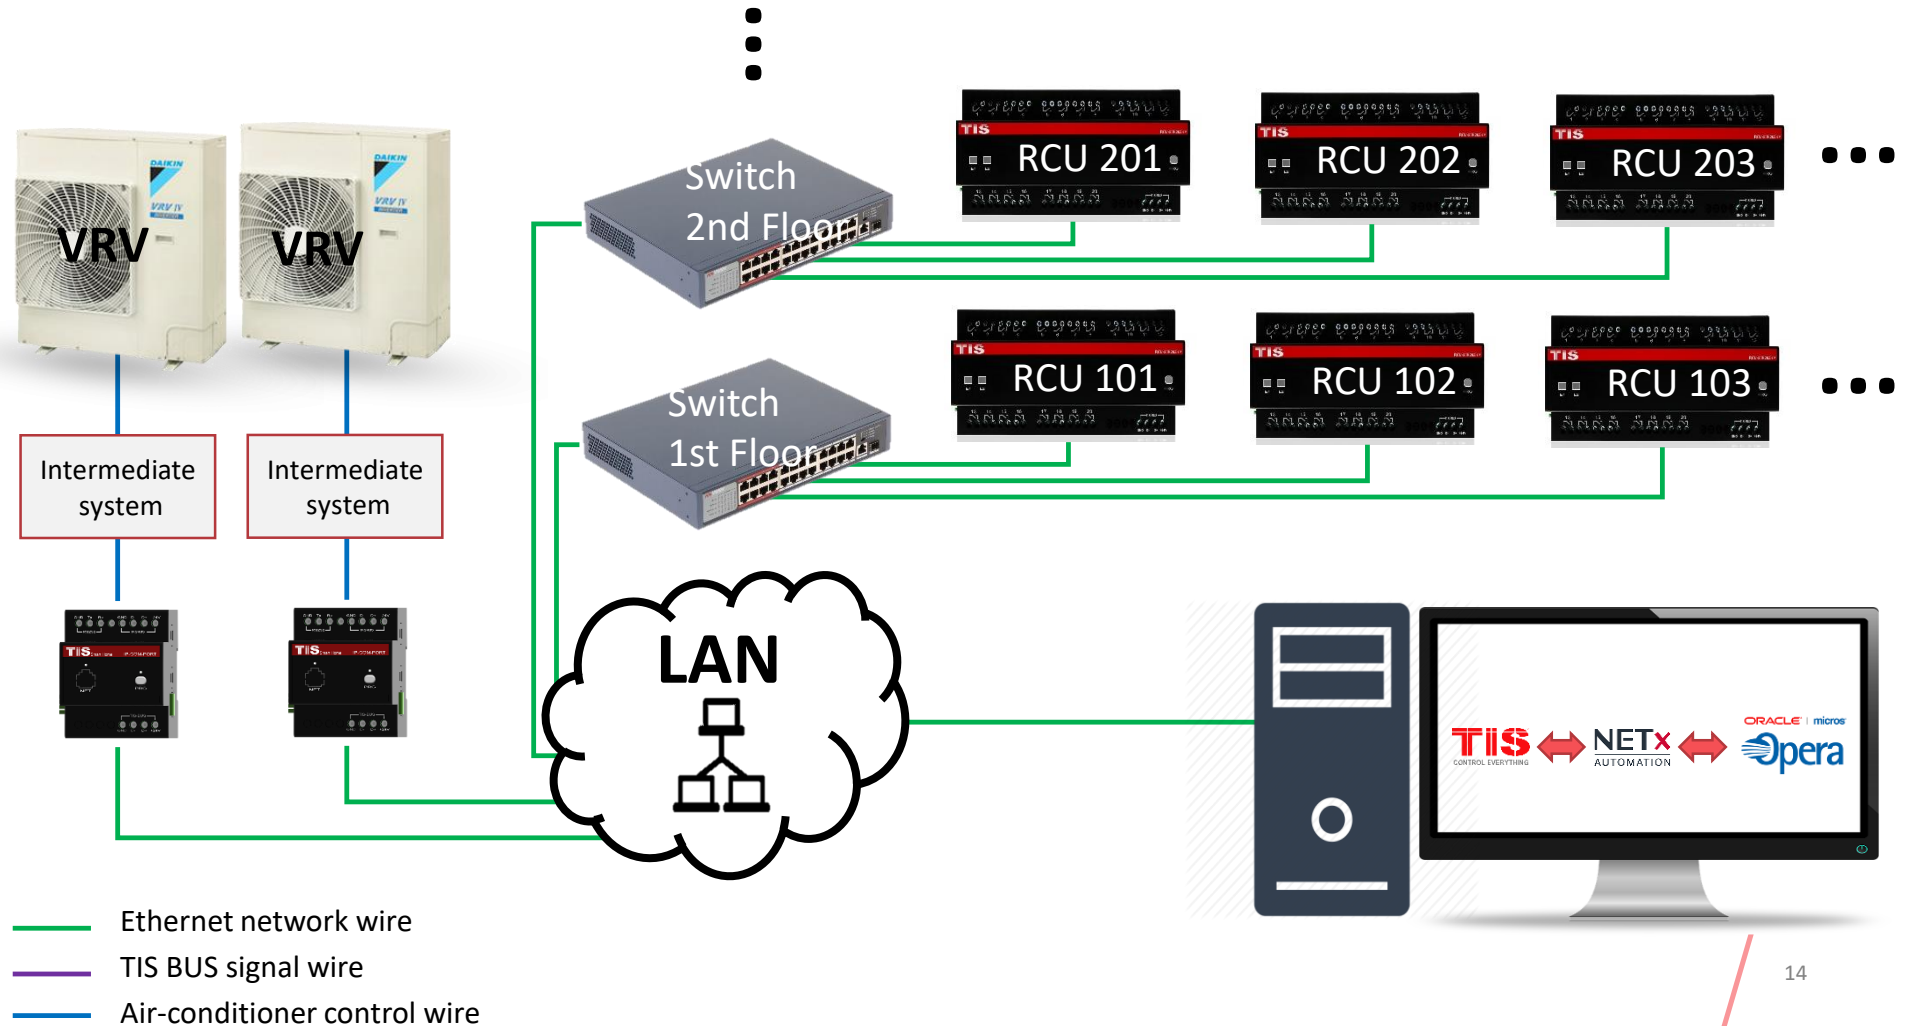

2.1 TYPICAL SYSTEM DIAGRAM 1

Applying to all types of user interfaces, control the air conditioner by infrared, HVAC

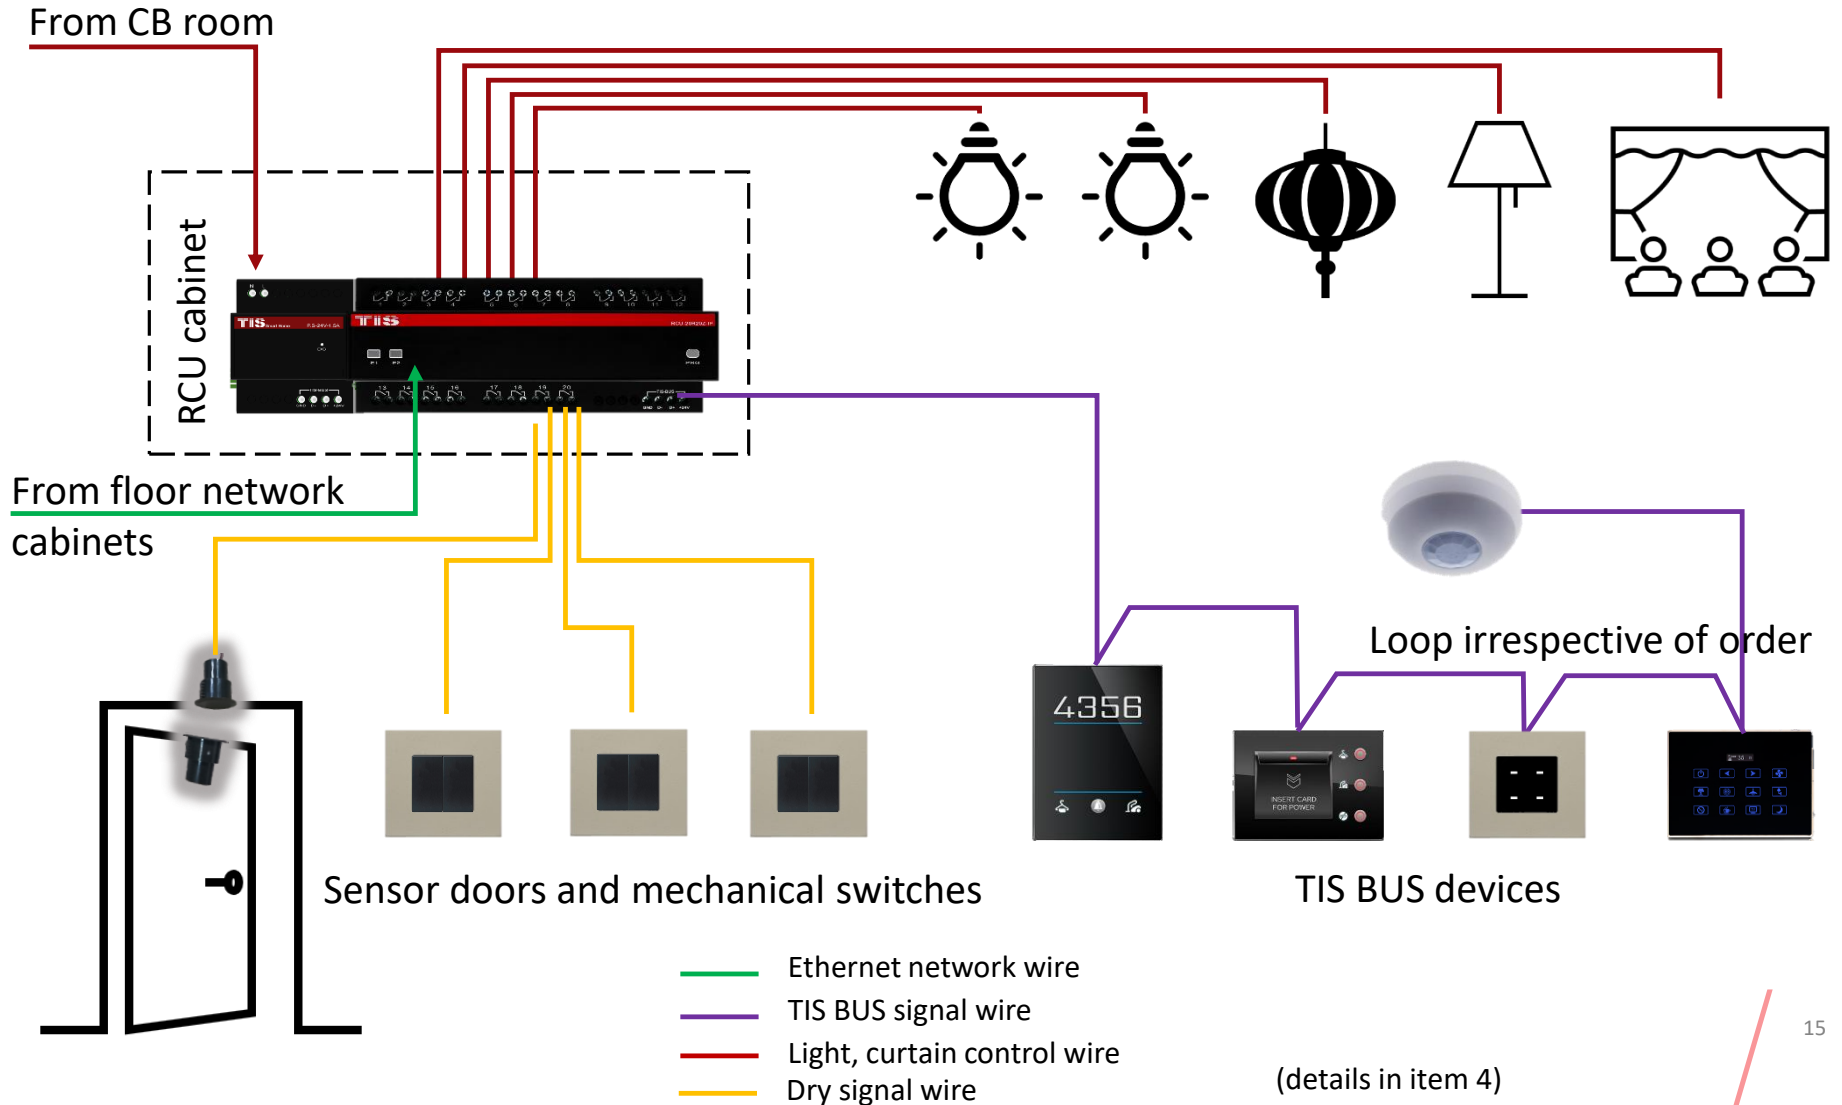

2.2 TYPICAL SYSTEM DIAGRAM 2

Applying to all types of user interfaces, using VRV air conditioning system.

2.3 DIAGRAM OF EQUIPMENT CONNECTION IN A ROOM

2.4 PLACEMENT OF DEVICES IN 1 ROOM

3 DEVICES

3.1 RCU CABINET

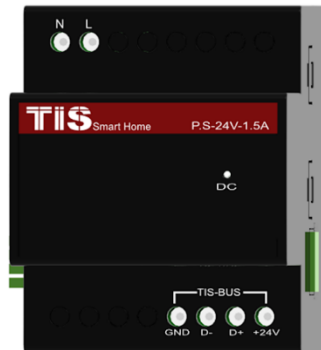

RCU equipment cabinets can be wall cabinets or industrial cabinets

A basic RCU cabinet includes 1 power module and 1 RCU module
Additional modules will be installed according to customer requirements

3.1.1 POWER SUPPLY MODULE

| | |
|----------------------|---|
| Code: | P.S-24V-1.5A |
| Installation: | install RCI cabinet |
| Function: | supply power for cabinets and TIS devices |
| Input: | 110-240VAC 50/60Hz |
| Output: | 24VDC 1.5A |

3.1.2 RCU MODULE

| | |
|----------------------|--|
| Code: | RCU-20R20Z-IP |
| Installation: | install RCU |
| Function: | Receive signals from the switch Turn on and off lights, curtains Communicate with the server |
| Signal: | TIS-BUS 20 dry signal output |
| Maximum load: | 20 relay channels Maximum per channel: 440VAC / 125VDC 10A (AC) |

3.2 USER INTERFACE

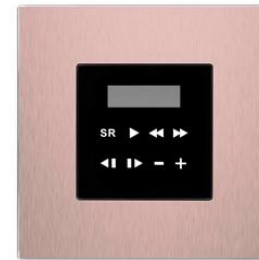

Could use one of the following 4 product lines, or combine them

Luna Hotel Series

IO Hotel Series

Terre Hotel Series

Mechanical switch

3.2.1 LUNA PRODUCT LINE

LUNA

SERIES

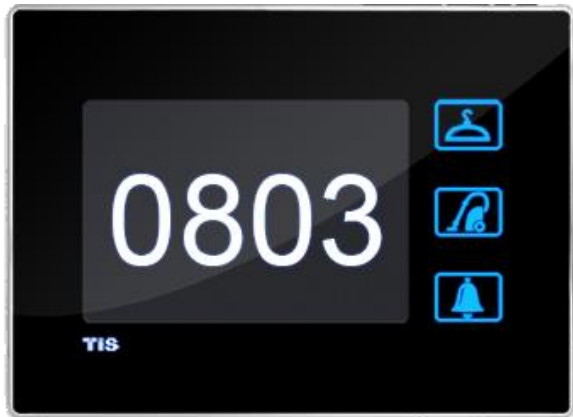

a Luna Bedside

- Code:** LUNA-BEDSIDE
- Installation:** install on the wall or in a box (as shown)
- Interface:** 0.9 "OLED screen, 12 touch keys (4 keys for air-conditioner, 8 keys for lights/ curtains)
- Functions:** control air conditioning, lights, and curtains in the room
- Connect:** TIS BUS (Included Addition)

b Luna Bell 3S

| | |
|----------------------|--|
| Code: | LUNA-BELL-3S |
| Installation: | on the wall |
| Interface: | Backlight shows the room number, 3 room states, Touch tone key |
| Functions: | show room status, press bell |
| Connect: | TIS BUS |

c Luna Bell 3S RF

- Code:** LUNA-BELL-3S-RF
- Installation:** on the wall
- Interface:** Backlight shows the room number,
3 room states,
Touch tone key
- Functions:** show room status, press bell, open the door by swiping the card
- Connect:** TIS BUS

c Switch Card

- Code:** CARD-SW-SRV3
- Installation:** on the wall
- Interface:** RF-Temic card slot
- Function:** Turn on the power in the room
- Connect:** TIS BUS

3.2.2 IO PRODUCT LINE

a IO AC with 4G

Code:

IO-AC-4G

Installation:

on the wall

Interface:

2.3 "OLED screen,
1 knob for air conditioner,
4 mechanical keys for
lights

Function:

control air-conditioner,
lights, curtains in a room

Connect:

TIS BUS

b IO outdoor bell without RF

Code:

IO-OUT-HOTEL

Installation:

on the wall

Interface:

Backlight shows the room number
2 room service lights,
1 mechanical chime key
(simultaneously shows DND)

Function:

show room status, press bell

Connect:

TIS BUS

c IO outdoor bell with RF

- Code:** IO-OUT-HOTEL-RF
- Installation:** on the wall
- Interface:** Backlight shows the room number
2 room service lights, 1 mechanical chime key (simultaneously shows DND)
- Function:** show room status, press bell, open the door by swiping the card
- Connect:** TIS BUS

c IO Switch Card

Code: IO-CARD-3SRV

Installation: on the wall

Interface: RF Temic card slot,
3 keys for room service
(Room cleaning,
laundry, DND)

Function: Turn on the power in the
room

Connect: TIS BUS

d 8-key IO board

Code: IO-8G

Installation: on the wall

Interface: 8 mechanical buttons

Function: control lights, curtains in a room

Connect: TIS BUS

3.2.2 TERRE PRODUCT LINE

TERRE
SERIES

a TERRE 4 keys

Code: TER-4G

Installation: on the wall

Interface: 4 touch keys

Function: control lights, curtains in a room

Connect: TIS BUS

b TERRE controls the air conditioner

| | |
|----------------------|---|
| Code: | TER-ACT |
| Installation: | on the wall |
| Interface: | 0.9 "OLED screen, 4 keys on / off, fan speed, temperature |
| Function: | control air - conditioner |
| Connect: | TIS BUS |

c TERRE requires service

| | |
|----------------------|--|
| Code: | TER-4SRV-B |
| Installation: | on the wall |
| Interface: | 4 touch keys (DND, Room Cleaning, Laundry, Exit) |
| Function: | Control panel out-of-room status |
| Connect: | TIS BUS |

d Socket, network socket, TERRE mechanical switch

In addition to touch switches, the TERRE series also has sockets, network sockets, ...

➡ Help synchronize the electrical system inside the room

e TERRE Frame

Frame: glass, aluminum, plastic with a variety of colors.

3.2.2 MECHANICAL SWITCH

Code: TE0810/TE0801, etc.

Installation: on the wall

Interface: Mechanical keys (in accordance with the TERRE frame)

Function: control lights, curtains in a room

Connect: RCU

In addition to the TIS mechanical switch, the TIS RCU can connect to any other type of mechanical switch.

➡ Wiring from the switch to the RCU cabinet

3.3 CONTROL REFRIGERATOR AND SENSOR

3.3.1 INFRARED TRANSMITTER 10F-ES

| | |
|----------------------|---|
| Code: | ES-10F-CM |
| Installation: | on the wall |
| Function: | Air conditioner control, Motion sensor, Logic |
| Connect: | TIS BUS |

3.3.2 REFRIGERATION CONTROLLER VRV

| | |
|----------------------|--|
| Code: | IP-COM-PORT |
| Installation: | in a cabinet |
| Function: | Communicate with VRV air conditioners through Intesis, CoolMaster, DT116A51 (Daikin), TCB-IFMB641T (Toshiba), etc. |
| Connect: | TIS BUS RS232, RS485 Ethernet |

(In addition to the VRV air conditioner control function, IP-COM-PORT can be used as a switching gateway between Ethernet and TIS BUS)

3.3.3 DOOR SENSORS

Installation: The wired part attached to the door frame,
The wireless part attached to the door

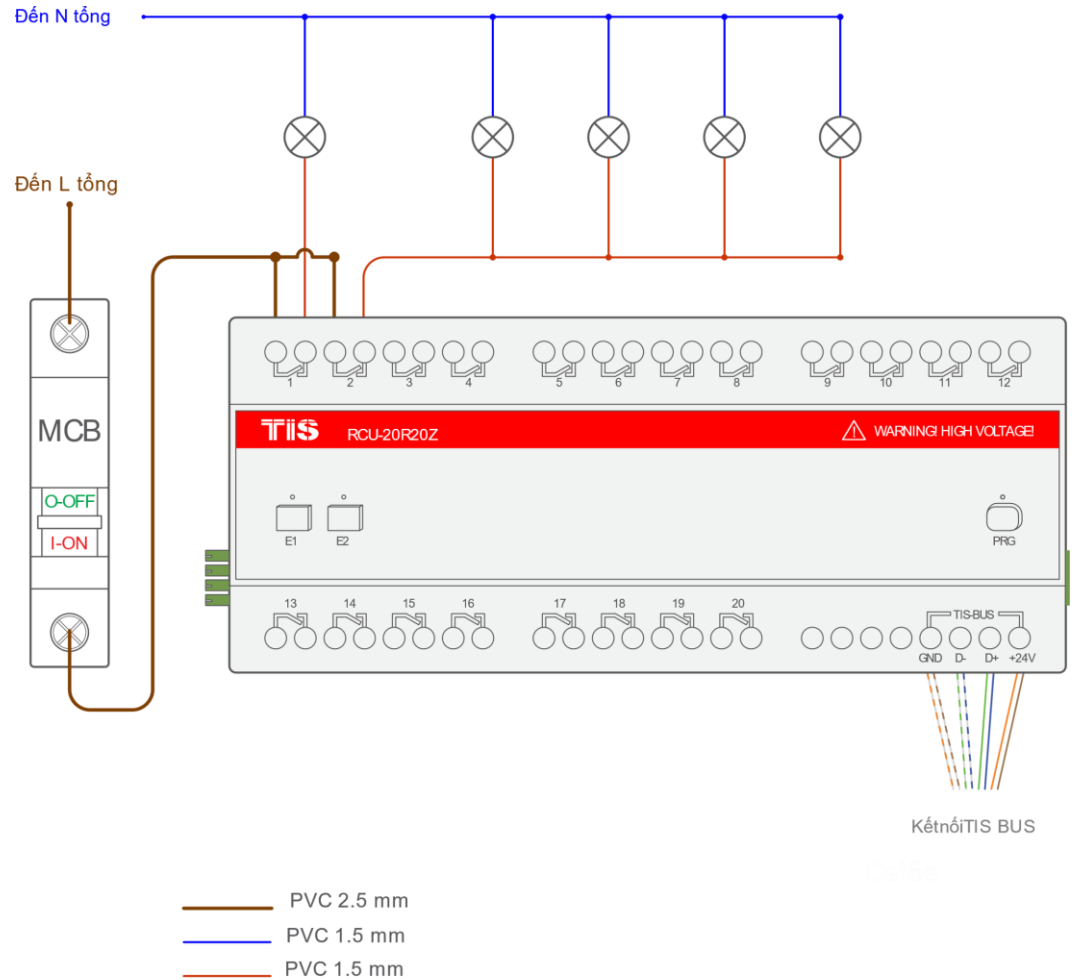

Function: Door status sensor

Connect: RCU

4 DEVICE CONNECTION

4.1 LIGHTS CONTROL CONNECTION

4.2 CURTAINS CONTROL CONNECTION

4.3 CONNECT DOOR LOCK CONTROLLER (MAGNETIC LOCK)

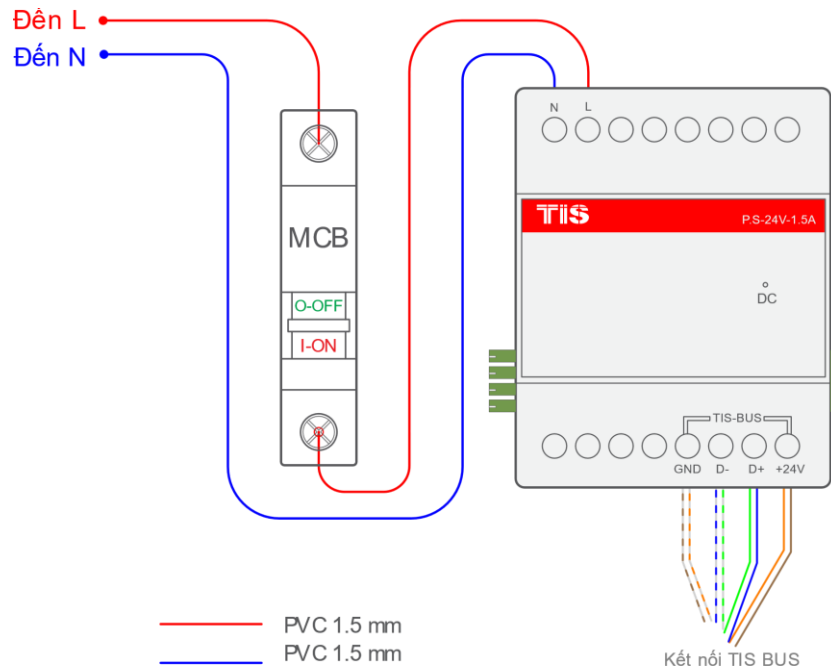

4.4 CONNECT DOOR SENSOR SIGNALS

4.5 CONNECT MECHANICAL SWITCH

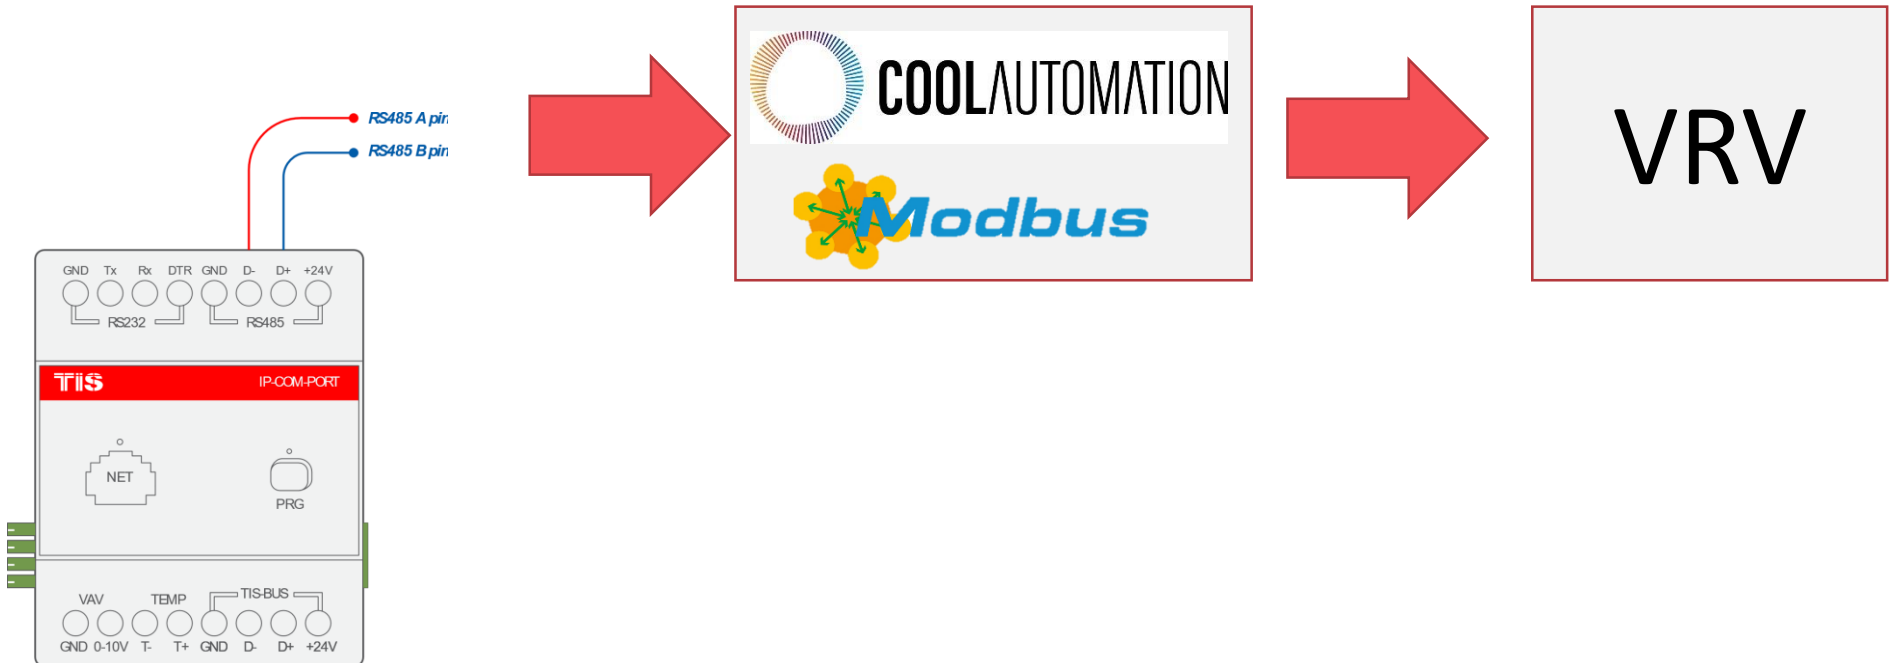

4.6 CONNECT THE SOURCE MODULE

The devices in the RCU are assembled on the din rail

4.7 CONNECT VRV REFRIGERATOR CONTROL

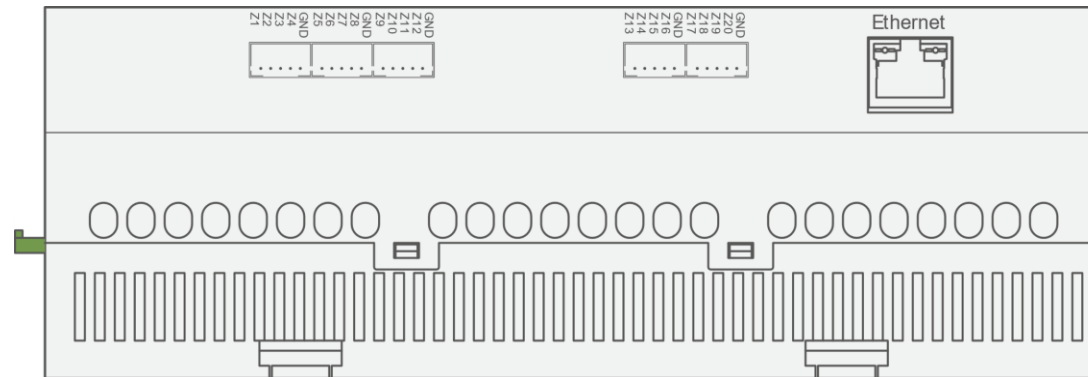

The IP-COM-PORT module connects to 3rd party devices via RS232 and RS485

4.8 CONNECT TIS BUS SIGNALS

4.9 CONNECT RCU WITH SERVER

Code RCU-20R-20Z-IP or IP-COM-PORT both have Ethernet connection to the Server

The connection between RCUs and the server is shown in Section 2

5 WORK OF THE SYSTEM

5.1 CHECK-IN

- Guests check in
- Receptionist entered the software, activated the card.
- Guests receive cards, go to the room

- Recognition software

5.2 CUSTOMERS OPEN DOOR

- Recognition software

- Guests use the card to unlock the door
 - > If the card is available, the door will be opened

5.3 PASSENGER ENTER THE ROOM

- Guests put the card in the Switch card
-> Turn on electricity,
enable script "enter room"

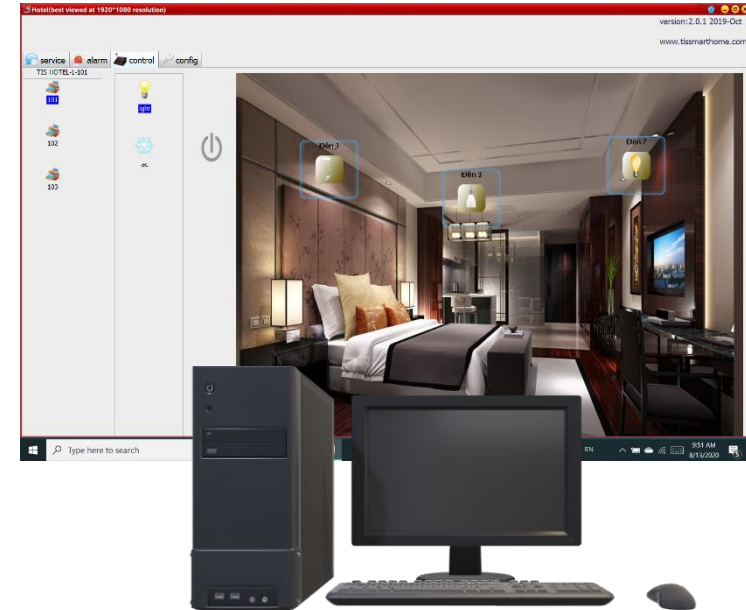

- Software recognizes, shows room status is on

5.4 CUSTOMERS USE THE ELECTRICAL SYSTEM

- Guests can quickly learn how to use the electrical system in the room

- The software shows the status of specific devices on

5.5 CUSTOMERS REQUEST ROOM SERVICES

Guests press the **laundry** or **cleaning** button to request service

Room status table outside the door changes status

- The software notifies after 30 seconds, avoiding the case of customers changing their mind or mistakenly clicking

5.6 CUSTOMERS DON'T WANT TO BE INTERRUPTED

Guest press the DND button

Room status table change status
Can't ring the bell

- The software is notified and shows DND enabled room status

5.7 GUESTS NEED URGENT ASSISTANCE

Lên cơn
đau tim!

- When the guest needs help, they press the SOS button

The image shows a computer monitor displaying the Hotelbest software interface. The interface includes a navigation menu with 'service', 'alarm', 'control', and 'config'. A table lists alarm events with columns for Status, RecvTime, Address, Message, MessageStatus, Comment, Operator, OperateResult, and OperateTime. An 'Alarm' dialog box is open, displaying the message 'TIS HOTEL-3-303 occur alarm(Bảo động)'. A red speech bubble points to the dialog box with the text 'Room 303 SOS!'. Below the monitor is a desktop computer setup with a tower PC, monitor, keyboard, and mouse.

| Status | RecvTime | Address | Message | MessageStatus | Comment | Operator | OperateResult | OperateTime |
|--------|--------------------|-----------------|----------|---------------|---------|----------|---------------|-------------|
| 🟢 | 2020-08-10 14:2... | TIS HOTEL-3-303 | Bảo động | suspend | | | | |
| 🟢 | 2020-08-10 14:2... | TIS HOTEL-3-303 | Bảo động | suspend | | | | |
| 🟢 | 2020-08-10 14:2... | TIS HOTEL-3-303 | Bảo động | suspend | | | | |

- The software will be alerted with sound immediately

5.8 GUESTS OPEN THE DOOR BUT STILL TURN ON THE AIR CONDITIONING

- Sensor detects windows/ doors opening

- After 5 minutes of not closing, send infrared (or send command to VRV) to turn off the air conditioner

5.9 THE GUESTS LEAVE THE ROOM

- The visitor withdraws the card from the Switch card
-> The power turns off after 30 seconds

- The software will recognize the room status is off

5.10 GUESTS CHECK OUT

- Guests check out.
- Reception enters the software, deactivates the card

- The software charges fee according to length of stay and room price

The screenshot shows a web application window titled "Hotel(best viewed at 1920*1080 resolution)". The interface includes a navigation bar with "service", "alarm", "control", and "config" tabs. A search filter panel on the left allows filtering by region, floor, room, message, status, start time, and end time. The main area displays a table of alarm events:

| Status | RecvTime | Address | Message | MessageStatus | Comment | Operator | OperateResult | OperateTime |
|--------|--------------------|-----------------|----------|---------------|---------|----------|---------------|-------------|
| ● | 2020-08-10 14:2... | TIS HOTEL-3-303 | Báo động | suspend | | | | |
| ● | 2020-08-10 14:2... | TIS HOTEL-3-303 | Báo động | suspend | | | | |
| ● | 2020-08-10 14:2... | TIS HOTEL-3-303 | Báo động | suspend | | | | |

An "Alarm" modal dialog box is displayed in the center, showing the message: "TIS HOTEL-3-303 occur alarm(Báo động)." with a "Next" button and a "1/2" indicator.

At the bottom of the interface, there is a log of events:

- 14:26:16 : Máy lạnh belong to TIS HOTEL-3-101 open.
- 14:26:28 : success.
- 14:26:35 : Máy lạnh belong to TIS HOTEL-1-101 closed.

Notice when the room 303 alarms
